

ATS OpenNotify

As communication channels continue to evolve and become more efficient, Utilities have an opportunity to relay critical messages to their customers. ATS is here to help. In our March Newsletter, we announced ATS OpenPay, our prepay system. One of the sub-components of Pre-Pay is a notification system. We are calling this system OpenNotify.

OpenNotify will be available in June. Your customers will be able to receive text messages for a variety of reasons. The following alerts will be delivered in our first version:

- ⇒ Each notification is account/service specific.
- ⇒ If a Utility chooses not to make use of a particular notification, it can be removed from display.
- ⇒ Customers must register through OpenAccess to use OpenNotify

Please see reverse side for an image of the form in OpenAccess
