ATS Partners with Square 9, Deliver Solutions for Shared Client

Castle Hayne, N.C., March 14, 2014 - ATS announces the implementation of a partnership with Square 9 Softworks as united solutions providers for Harrison Rural Electric Cooperative, a mutual client based out of Corydon, Indiana. The partnership is designed to add value to clients through a shared commitment in solutions delivery from both companies.

In search of a cost-effective document management system, Harrison REMC required a solution capable of integrating with their existing OpenOne Customer Information System (CIS). Square 9's SmartSearch document management software allows Harrison REMC to scan membership applications, easements and other types of documents from within the CIS, and directly archive them into the SmartSearch database. In return, documents are easily retrievable from within the CIS repository, as well as SmartSearch.

The next phase of the project will broaden the integration to include the Financial Information System for business data within accounts payable and human resources. If you have any questions or would like more information on this integration, please contact:
